ISS496 – Senior Project (CSE)

Robotic Dog System with Adaptive Navigation and Mission Control

Project Report

Authors:

Ahmed Hamouda, Youssef Benmoussa,
Aymen Saad, Mohamed Ali Damak,
Ahmed Ridha Melayah

Supervised by Enova ROBOTICS

Date: May 2026

This report documents the complete design, implementation, testing, and validation of a robotic dog system meeting Foundation Priorities 1 & 2 and Feature Set 3 capabilities. Engineering grounded in safety principles and comprehensive testing protocols.

List of Figures	4
List of Tables	5
Acknowledgments	6
Abstract	7
Executive Summary	8
1 Project Overview	9
1.1 Introduction	9
1.2 Project Description	9
1.3 Priority-Based Requirements Framework	9
1.4 Problem Statement	9
1.5 Project Objectives	9
1.6 System Scope and Constraints	9
1.7 Asimov's Three Laws in Robotic Context	9
1.8 Conclusion	9
2 Benchmark	10
2.1 Reference Systems and Similar Designs	10
2.2 Benchmarking Methodology	10
2.3 Comparative Performance Results	10
2.4 Component Selection Rationale	10
2.5 Trade-Off Analysis	10
2.6 Benchmark Summary	10
3 Project Management	11
3.1 Team Roles and Responsibilities	11
3.2 Project Timeline and Milestones	11
3.3 Risk Management	11
3.4 Resource Allocation	11
3.5 Communication Plan	11
4 System Architecture	12
4.1 System Overview and Diagrams	12
4.2 Use Case Diagram	12
4.3 Sequence Diagram	12
4.4 Block Diagram	12

4.5	Interface Architecture	12
5	Mechanical and 3D Design	13
5.1	Design Requirements	13
5.2	Materials Selection (PLA, etc.)	13
5.3	Assembly Process (Screws and Fasteners)	13
5.4	Movement Mechanisms	13
5.5	3D Model Overview	13
6	Power System Architecture and Energy Management	14
6.1	Power System Overview	14
6.2	Battery Architecture and Runtime Estimation	14
6.3	Converter Topology and Voltage Regulation	14
6.4	Power Distribution and Component Allocation	14
6.5	Power Circuit Design and Load Path	14
6.6	Energy Efficiency and Battery Life Analysis	14
6.7	Protection and Management Strategy	14
7	IoT Systems	15
7.1	Circuit Design	15
7.2	Sensor Integration	15
7.3	Connectivity Architecture	15
7.4	Data Acquisition	15
7.5	IoT System Overview	15
8	Dashboard	16
8.1	Dashboard Overview	16
8.2	User Interface Design	16
8.3	Telemetry Display	16
8.4	Control and Monitoring Features	16
8.5	Dashboard Architecture	16
9	ROS2	17
9.1	ROS2 Architecture	17
9.2	Nodes and Topics	17
9.3	Middleware Integration	17
9.4	Simulation and Deployment	17
9.5	ROS2 System Overview	17
10	Testing	18
10.1	Introduction	18
10.2	Testing Strategy	18
10.3	Functional Requirements Validation	18
10.4	Integration Testing	18
10.5	Performance Evaluation	18
10.6	Test Summary	18
11	Conclusion	19
11.1	Project Achievements	19

11.2 Key Learnings 19

11.3 Performance Summary 19

11.4 Recommendations 19

Abstract

Executive Summary

Chapter 1

Project Overview

1.1 Introduction

1.2 Project Description

1.3 Priority-Based Requirements Framework

1.4 Problem Statement

1.5 Project Objectives

1.6 System Scope and Constraints

1.7 Asimov's Three Laws in Robotic Context

1.8 Conclusion

Chapter 2

Benchmark

2.1 Reference Systems and Similar Designs

2.2 Benchmarking Methodology

2.3 Comparative Performance Results

2.4 Component Selection Rationale

2.5 Trade-Off Analysis

2.6 Benchmark Summary

Chapter 3

Project Management

3.1 Team Roles and Responsibilities

3.2 Project Timeline and Milestones

3.3 Risk Management

3.4 Resource Allocation

3.5 Communication Plan

Chapter 4

System Architecture

4.1 System Overview and Diagrams

4.2 Use Case Diagram

4.3 Sequence Diagram

4.4 Block Diagram

4.5 Interface Architecture

Chapter 5

Mechanical and 3D Design

5.1 Design Requirements

5.2 Materials Selection (PLA, etc.)

5.3 Assembly Process (Screws and Fasteners)

5.4 Movement Mechanisms

5.5 3D Model Overview

Chapter 6

Power System Architecture and Energy Management

6.1 Power System Overview

6.2 Battery Architecture and Runtime Estimation

6.3 Converter Topology and Voltage Regulation

6.4 Power Distribution and Component Allocation

6.5 Power Circuit Design and Load Path

6.6 Energy Efficiency and Battery Life Analysis

6.7 Protection and Management Strategy

Chapter 7

IoT Systems

7.1 Circuit Design

7.2 Sensor Integration

7.3 Connectivity Architecture

7.4 Data Acquisition

7.5 IoT System Overview

Chapter 8

Dashboard

8.1 Dashboard Overview

8.2 User Interface Design

8.3 Telemetry Display

8.4 Control and Monitoring Features

8.5 Dashboard Architecture

Chapter 9

ROS2

9.1 ROS2 Architecture

9.2 Nodes and Topics

9.3 Middleware Integration

9.4 Simulation and Deployment

9.5 ROS2 System Overview

Chapter 10

Testing

10.1 Introduction

10.2 Testing Strategy

10.3 Functional Requirements Validation

10.4 Integration Testing

10.5 Performance Evaluation

10.6 Test Summary

Chapter 11

Conclusion

11.1 Project Achievements

11.2 Key Learnings

11.3 Performance Summary

11.4 Recommendations
